Projects

CodeArena – Real-Time Coding Battle Platform

Tech: Next.js, TypeScript, Node.js, Express.js, MongoDB, Redis, Socket.IO, Docker, AWS EC2, Nginx

GitHub: github.com/guptakaran20/CodeBattle | Live: codearenabattle.vercel.app

- Architected a real-time competitive coding platform enabling users to create battle rooms, compete on coding challenges, and view synchronized live leaderboards.
- Built scalable REST APIs using Express.js with JWT authentication and Google OAuth for secure session management.
- Implemented Redis- and Socket.IO-powered real-time synchronization for matchmaking, timers, submissions, and battle events.
- Integrated the Piston API for secure multi-language code execution and containerized the application using Docker Compose.
- Deployed the platform on AWS EC2 behind an Nginx reverse proxy for a production-ready setup.

SponsorGrid – Sponsorship Management Platform

Tech: Next.js, TypeScript, Express.js, PostgreSQL, Prisma ORM, Cloudinary

GitHub: github.com/guptakaran20/Sponsorship | Live: trysponsorgrid.vercel.app

- Developed a full-stack SaaS platform enabling college clubs to manage sponsors, partnerships, leads, and funding workflows.
- Designed scalable relational database models using Prisma ORM and PostgreSQL with optimized CRUD operations and type-safe database access.
- Implemented Google OAuth authentication, Cloudinary-powered media management, and responsive dashboards using Next.js and TypeScript.

Arovia Vibes – Full Stack eCommerce Platform

Tech: Next.js, TypeScript, Tailwind CSS, Supabase, Framer Motion, Resend

GitHub: github.com/guptakaran20/AroviaVibes | Live: aroviavibes.vercel.app

- Developed a production-ready full-stack eCommerce platform using Next.js, TypeScript, and Supabase with secure authentication and backend integration.
- Designed a premium shopping experience through responsive layouts, reusable components, and fluid animations using Framer Motion.
- Implemented secure form validation with React Hook Form and Zod, along with email communication workflows using Resend.
- Optimized performance, responsiveness, and accessibility to deliver a seamless cross-device user experience.

Technical Skills

Languages: C++, TypeScript, JavaScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Socket.IO, WebSockets, JWT Authentication, Google OAuth

Databases: PostgreSQL, MongoDB, MySQL, Redis, Prisma ORM

DevOps & Tools: Docker, Docker Compose, AWS EC2, Nginx, Git, GitHub, Vercel

Experience

Backend Developer Intern

Jun 2026 – Present

XCEED NIT Jalandhar

- Contributing to the backend development of an Intelligent Attendance Management System (iAMS).

Education

Dr. B. R. Ambedkar National Institute of Technology, Jalandhar

B.Tech – Instrumentation and Control Engineering

2025 – 2029

Achievements

- Solved 450+ Data Structures and Algorithms problems on LeetCode.
- Achieved a 1500 rating (2★) on CodeChef.
- Built and deployed multiple production-ready full-stack applications using AWS EC2, Docker, Redis, and Nginx.
- Strong understanding of scalable backend systems, REST API design, and real-time communication using Socket.IO.
